Employment History

TMA Solutions

Jul 2018 – Dec 2018

Manual Tester / Technical Writer

I started my testing career here, spent 2 months learning and working in various testing processes... After doing Manual Tester for a quite of time, I applied for Technical Writer to learn flows and solutions for variety of projects.

Sep 2019 - Jul 2020

Automation Tester

Later, I decided to change to Automation Testing for more challenges. Learning and writing test scripts using Robot Framework & Katalon for many testing projects...

Freelance

Jul 2020 – Present

Freelancer

After postponing my graduation for job, I decided this was the best time to continue it. So, I switched from a full-time position to part-time in order to still be able to maintain the necessary skills, and have time to finish my degree.

Career Orientation

After gaining experience in Quality Assurance, I decided to pursue my dream to become a Business Analyst. I'm always fascinated with working directly to client/end user; therefore, I can get to know my customer's problems and able to give out my solutions then transfer to development teams.

Education

Jan 2016 – Dec 2020

FPT University

Bachelor of Software Engineering

Skills

Robot Framework in Python

Selenium in Java/C#

Familiar with Agile process

Communication in English

Documenting/Diagramming project
